

## ELEMENTS OF ART:

**LINE** - Are there thick, thin, curvy, jagged, or straight lines?

**VALUE** - Is there a range of tones from dark to light? (Squint your eyes). Where is the darkest value? The lightest?

**COLOR** - What colors have been used? What kind of color scheme do you see (many colors, few, light colors, dark colors, etc)? Is there a range of colors (palette)? Describe the colors in terms of their harmony or contrast with each other.

**SHAPE** - Do you see geometric or organic shapes? Do positive shapes, such as objects, dominate the composition, or are there more negative shapes that represent voids? Is there one principle shape or is it composed of interrelating combinations of shapes?

**SPACE** - Is the space deep or shallow? How has the artist created a sense of space? (Is it portrayed with an emphasis on the horizontal or vertical?)

**TEXTURE** - Do you see the illusion of textures within the image? Is there an actual texture on the surface of the image or object?
